

Australian Earth Science Education is here to support you

These are undoubtedly testing times for all Australians, given the impact COVID-19 is having on the way we live.

As schools across Australia transition to online delivery, we would like to remind you that our extensive resources are ready for you to use now. Across the ESWA (www.earthsciencewa.com.au), WASP (www.wasp.edu.au) and PALMS (www.palms.edu.au) websites there are a large number of free resources that can be accessed by anyone, including:

- Hands-on activities (that can be resourced using common household equipment)
- STEM challenges
- Videos (on our YouTube channel)
- Quizzes and interactives (via WASP)

More support to follow

The team are currently working on how we can support you further in providing quality online learning experiences for your students. Please keep an eye on our social media channels (Facebook - @AusEarthEd and Instagram – AusEarthEd) for updates.

Our new branding

The Earth Science Western Australia (ESWA) team is delighted to be offering on the ground support services to other regions in Australia under a new name – Australian Earth Science Education (AusEarthEd).

To receive updates about these new projects, click on the following:
